

Zone de vissage

The image is a technical drawing of a mechanical component, likely a bracket or a housing. It features a large, light-gray shaded area representing a specific functional region. This region is bounded by a complex, irregular outline with several notches and protrusions. Within this shaded area, there is a smaller, rounded rectangular region filled with a darker gray, labeled 'Zone de vissage' (drilling zone). To the left of the main part, there is a small, vertically oriented rectangular feature with a hatched pattern, possibly representing a fastener or a specific detail. The background of the drawing is white, with several diagonal lines extending from the top-left and bottom-right corners, suggesting a perspective or a specific orientation of the part.
